

## Formulating Significant Learning Goals (Outcomes)

Learning Goals (Outcomes) are the cornerstone of instruction. These statements allow you to state what the students will be able to know or do after a lesson, unit, and/or class. This is key because engagement increases when students know what they need to know and do, and where they are headed.

### A Year After

The basic procedure for formulating learning goals (outcomes) is to ask a series of questions about each kind of learning that is potentially relevant.

*A year after this course is over, I want and hope that my students will...*
